

H4a (positive): $\rho = 0.08$ [-0.09, 0.26]
Holm $p = 0.355$, $n = 124$

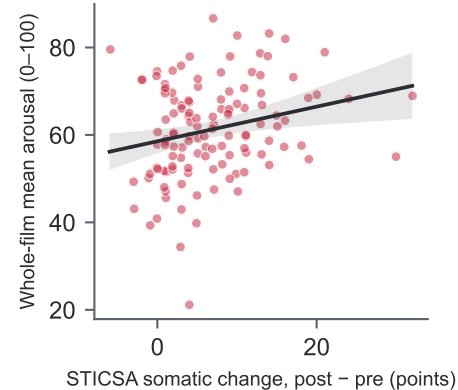

H4b (negative): $\rho = -0.32$ [-0.46, -0.16]
Holm $p = 0.001$, $n = 124$

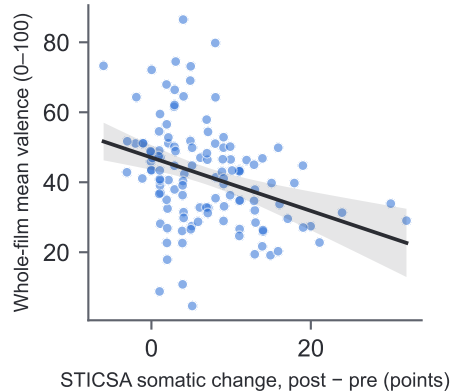

H4c (positive): $\rho = 0.18$ [0.00, 0.35]
Holm $p = 0.098$, $n = 124$

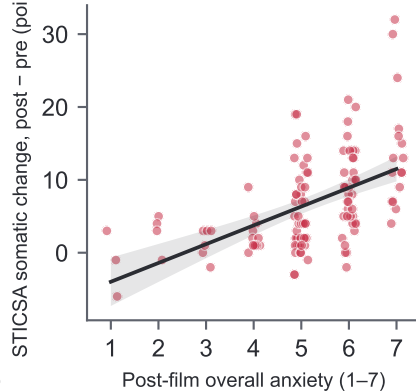

H5a (positive): $\rho = 0.24$ [0.05, 0.41]
Holm $p = 0.008$, $n = 124$

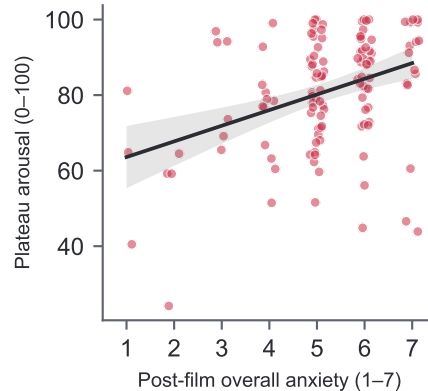

H5b (negative): $\rho = -0.38$ [-0.51, -0.23]
Holm $p < .001$, $n = 124$

H6a (positive): $\rho = 0.56$ [0.44, 0.67]
Holm $p < .001$, $n = 124$

H6b (positive): $\rho = 0.34$ [0.15, 0.50]
Holm $p < .001$, $n = 124$

Points: participants (jittered sideways).
Line and band: least-squares fit
with 95% CI (visual guide).
Test: Spearman ρ ; 95% CI: bootstrap
(5000 resamples of participants).
