

H4a (positive):  $\rho = 0.68$  [0.31, 0.89]  
Holm  $p = 0.002$ ,  $n = 21$

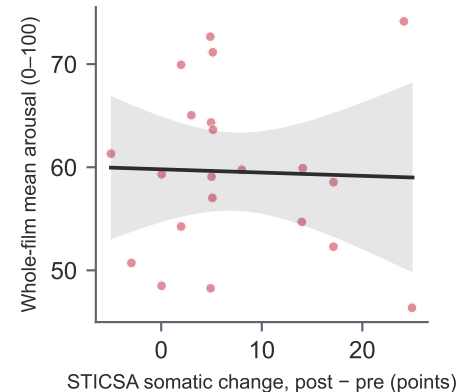

H4b (negative):  $\rho = -0.60$  [-0.83, -0.22]  
Holm  $p = 0.008$ ,  $n = 21$

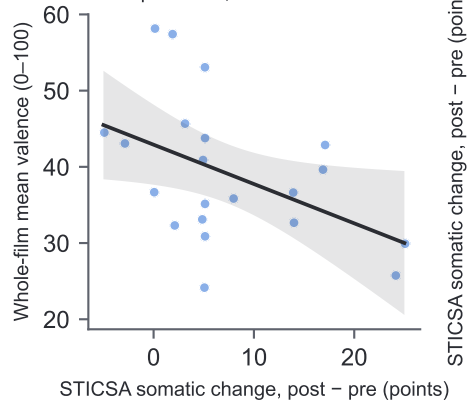

H4c (positive):  $\rho = 0.35$  [-0.14, 0.75]  
Holm  $p = 0.120$ ,  $n = 21$

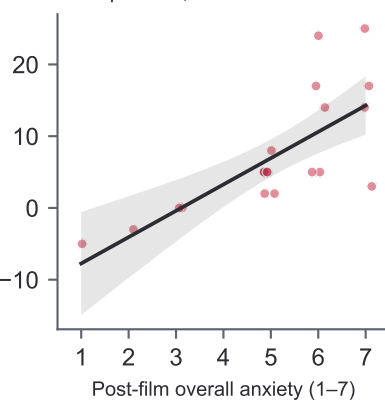

H5a (positive):  $\rho = -0.03$  [-0.52, 0.46]  
Holm  $p = 0.914$ ,  $n = 21$

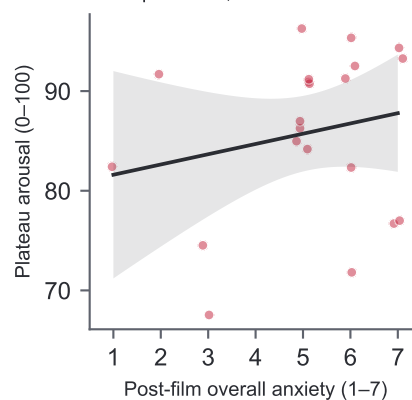

H5b (negative):  $\rho = -0.51$  [-0.76, -0.12]  
Holm  $p = 0.035$ ,  $n = 21$

H6a (positive):  $\rho = 0.77$  [0.41, 0.95]  
Holm  $p < .001$ ,  $n = 21$

H6b (positive):  $\rho = 0.19$  [-0.34, 0.65]  
Holm  $p = 0.405$ ,  $n = 21$

Points: participants (jittered sideways).  
Line and band: least-squares fit  
with 95% CI (visual guide).  
Test: Spearman  $\rho$ ; 95% CI: bootstrap  
(5000 resamples of participants).
